EXPLANATION OF GROUP SYMBOLS

GROUPS OF TYPES 11, 12, 13, and 14:

- A-Wrappers
- B-Leaf and smoking leaf
- C-Cutters
- X-Lugs and primings
- S-Scrap
- N-Nondescript

GROUPS OF TYPES 21, 22, 23, and 24:

- A-Wrappers
- B-Heavy leaf
- C-Thin leaf
- X-Lugs
- S-Scrap
- N-Nondescript

GROUPS OF TYPE 31:

- A-Wrappers
- B-Bright leaf, red leaf, and tips
- C-Lugs and cutters
- X-Trash and flyings
- S-Scrap
- N-Nondescript

GROUPS OF TYPE 32:

- B-Heavy leaf or dull crop
- C-Thin leaf or bright crop
- X-Seconds and ground leaves
- S-Scrap
- N-Nondescript

GROUPS OF TYPES 35, 36, and 37:

- A-Wrappers
- B-Heavy leaf
- C-Thin leaf
- X-Lugs
- S-Scrap
- N-Nondescript

GROUPS OF TYPE 41:

- B-Binders or tops
- C-Fillers (farm wrappers)
- X-Crop-run and stemming grades
- Y-Farm fillers or ground leaves
- S-Scrap
- N-Nondescript

GROUPS OF TYPES 42, 43, and 44:

- C-Fillers (farm wrappers)
- X-Crop-run and stemming grades
- Y-Farm fillers or ground leaves
- S-Scrap
- N-Nondescript

GROUPS OF TYPE 46:

- C-Superior
- X-Inferior
- Y-Defectuoso
- S-Scrap (Picadura)
- N-Nondescript

GROUPS OF TYPES 51, 52:

- A-Wrappers
- B-Binders, seconds, and brokes
- C-Fillers and short darks
- X-Stemming grades
- S-Scrap
- N-Nondescript

GROUPS OF TYPE 53:

- B-Binders, seconds, and brokes
- X-Crop-run and stemming grades
- S-Scrap
- N-Nondescript

GROUPS OF TYPES 54 and 55:

- B-Binders
- C-Fillers
- X-Crop-run and stemming grades
- S-Scrap
- N-Nondescript

GROUPS OF TYPE 56:

- B-Binders
- S-Scrap
- N-Nondescript

GROUPS OF TYPES 61 and 62:

- A-Wrappers
- B-Stout wrappers and binders
- C-Fillers or tips
- S-Scrap
- N-Nondescript

GROUPS OF TYPES 81, 82, and 83:

- A-Wrappers
- C-Fillers
- S-Scrap

STOCKS OF LEAF TOBACCO OWNED BY DEALERS AND MANUFACTURERS

Leaf Tobacco Stocks Slightly Larger Than on Previous October 1

Leaf tobacco inventories owned by dealers and manufacturers in the United States and Puerto Rico totaled 3,759 million pounds (farm-sales-weight) as of October 1, 1951, an increase of 83 million pounds compared with a year earlier. Larger stocks of flue-cured leaf accounted for most of this increase.

During the third quarter, July-September 1951, approximately 865 million pounds were marketed by growers, compared with around 800 million during the corresponding quarter last year. The marketings consisted of about 835 million pounds of flue-cured leaf with the balance composed of Maryland and cigar-leaf.

For the southern types holdings of flue-cured tobacco increased 4 percent compared with a year earlier, and Maryland 8 percent. On the other hand, Burley holdings decreased slightly and fire-cured and dark air-cured stocks were each down a little more than 10 percent. For the cigar-leaf types, stocks of the filler types were up 5 percent compared with October 1 last year, binder type stocks increased 5 percent, and the wrapper types 10 percent. Stocks of foreign-grown cigarette tobaccos increased 17 percent over October 1 a year ago.

1/ Figures quoted for type totals in this summary are the farm-sales-weight equivalent of reported stocks except foreign-grown leaf which is converted to an unstemmed equivalent basis only. Tables in the body of the report show stocks on a farm-sales-weight basis; stocks in detail on a reported weight basis, subdivided according to recognized groupings; and stocks owned by dealers and manufacturers, separately.

2/ The general instructions for filing the tobacco stocks reports, required of dealers and manufacturers by the United States Department of Agriculture, specify that the report shall be made as of the opening of business on the first day of each quarter.

CIGARETTE-LEAF STOCKS

Flue-cured and Maryland Stocks Up from A Year Ago
Burley Down Only Slightly; Turkish Type Larger

Marketing of the 1951 flue-cured tobacco crop, estimated at slightly over 1.4 billion pounds began in July and sales by producers totaled about 835 million pounds through September 30. This is 55 million pounds more than were auctioned through this date from the 1950 crop. Flue-cured tobacco stocks were raised to 1,935 million pounds as of October 1, 1951 compared with 1,857 million a year ago.

Holdings of Burley tobacco of 981 million pounds as of October 1, 1951, were 19 million pounds below the previous October 1. Disappearance of Burley tobacco, as indicated by production estimates and changes in stocks, totaled 516 million pounds during the marketing year October 1950-September 1951, compared with 534 million during the preceding marketing year. Domestic consumption of 486 million pounds was down 7 million from the previous year's level and exports of about 30 million pounds were down 11 million pounds.

Stocks of Maryland leaf amounted to 64.3 million pounds for an increase of 4.5 million over a year ago. Marketing of the 1950 crop of 40 million pounds was completed during the third quarter this year. Disappearance of Maryland leaf during the 1950-51 marketing year totaled 35.5 million pounds or approximately the same as during the previous year. Exports of Maryland leaf of 8.4 million pounds during the past marketing year were slightly larger than during the previous year, whereas indicated domestic usings of 27.1 million were slightly lower.

Stocks of Foreign-grown cigarette and smoking tobacco (Turkish and other) as of October 1, 1951 totaled 166.4 million pounds, representing an increase of about 25 million compared with a year earlier.

DARK TOBACCO STOCKS

Lower Stocks of Dark Tobaccos

Fire-cured tobacco stocks were down 17.5 million pounds compared with holdings as of October 1 a year ago. Leaf inventories of these types totaled 147.2 million pounds as of October 1, 1951. Most of the decrease was in holdings of Type 23, but stocks of Type 22 were also lower. On the other hand, stocks of Type 21 tobacco were up 1.8 million pounds. Stocks of Virginia fire-cured leaf this October 1 totaled 24.7 million pounds; Eastern district Tennessee and Kentucky fire-cured, 90.7 million; Western District 31.6 million, and Henderson Stemming 0.3 million. Disappearance of fire-cured leaf during the marketing year October 1950-September 1951 was 75.0 million pounds compared with 64.6 million during the previous year. Larger exports, which totaled about 40 million pounds, accounted for the increase while domestic consumption of 35 million pounds was the same as during the previous year.

Stocks of dark air-cured tobacco also showed a marked decline, compared with the previous October 1. Holdings this October 1 were 71.7 million pounds as against 79.8 million a year earlier. The following inventories as of October 1, 1951 are lower for each type than a year ago: One Sucker, 38.0 million pounds; Green River, 31.0 million; and Virginia sun-cured, 2.8 million. Disappearance of dark air-cured leaf of 36.8 million during the 1950-51 marketing year was considerably greater than the 30.2 million disappearance during the previous year. Both domestic consumption and exports were larger.

CIGAR LEAF STOCKS

Stocks of Cigar-Leaf Types Show Increase

Stocks of all types of domestic grown cigar-leaf including Puerto Rican, totaled 372.8 million pounds (farm-sales-weight) on October 1, 1951, an increase of approximately 20 million pounds compared with a year earlier. Puerto Rican tobacco stocks were lower than on the previous October 1, in contrast to larger inventories for all other types. Holdings of foreign-grown leaf were 17.0 million pounds (unstemmed equivalent) this October 1 compared with 17.6 million on this date last year.

Cigar-filler stocks totaled 205.1 million pounds for an increase of 10.2 million over the previous October 1. Larger holdings of Type 41 and Types 42-44 considerably more than balanced the decrease in stocks of Type 46 tobacco. Stocks of cigar-filler leaf consisted of 126.2 million pounds of Pennsylvania Seedleaf, 31.2 million of Ohio filler, and 47.8 million of Puerto Rican tobacco. Of the Puerto Rican stocks, 26.8 million pounds were in Puerto Rico. Based on Production estimates and changes in stocks, indicated disappearance of Pennsylvania Seedleaf tobacco during the past year, October 1950-September 1951, was 50.2 million pounds compared with 48.1 million during the previous year; Ohio filler was 7.4 million compared with 9.1 million; and Puerto Rican filler was 28.8 million compared with 28.0 million.

Stocks of the cigar-binder types of 142.4 million pounds represented an increase of 7.3 million over the previous October 1. Holdings this October 1 were divided as follows: Connecticut Valley Broadleaf 29.8 million pounds, Connecticut Valley Havana Seed 27.3 million, New York and Pennsylvania Havana Seed 2.0 million, Southern Wisconsin 40.3 million pounds and Northern Wisconsin 43.0 million. Indicated disappearance of the binder tobacco types during the 1950-51 marketing year totaled 57.8 million pounds compared with 50.2 million during the previous year. Except for Type 53, the disappearance during 1950-51 was larger for each type than during the previous period.

Stocks of the cigar-wrapper types were reported as 25.3 million pounds, about 2.3 million more than on the same date last year. Stocks of Connecticut Valley Shade were 14.6 million pounds and Georgia-Florida shade tobacco 10.7 million pounds. Most of the new crop of Type 62 and part of Type 61 entered stocks during the third quarter this year.

Stocks of Cuban leaf of 16.3 million pounds as of October 1, 1951 were about the same as were on hand a year earlier. However, holdings of Sumatra and Java tobacco of 0.5 million pounds were down 0.4 million from the previous October 1.

Stocks of Burley tobacco for October 1, 1950 were revised from 996,045,000 to 1,000,243,000 pounds (farm-sales-weight).

Table 1.--Average percentage of weight remaining after handling, sweating, drying, and stemming for all types of tobacco, and factors used for adjusting stocks reported by dealers and manufacturers to a farm-sales weight equivalent 1/

1 Information in this table taken from U. S. Department of Agriculture Circular 475, Tobacco Shrinkage and Losses in Weight in Handling and Storage, issued in July 1937. 2 Factors for converting unstemmed stocks to farm-sales weight are adjusted on the basis of an average loss on the reported weight and should not be taken as indicative of full shrinkage after handling, sweating and storage. 3 Ohio-Miami Valley filler types of tobacco packed in cases by growers before delivery. 4 See footnote 1 on page 5 for conversion factor to the farm-sales weight equivalent. 5 Tentative factor. 6 Factor has not been determined.

Table 2.-Stocks of leaf tobacco owned by dealers and manufacturers, by types, converted to a farm-sales-weight equivalent, October 1, 1951, compared with other quarters 1/

1/ For factor used in converting weights see table 1 except for cigar leaf. The instructions for reporting unstemmed cigar-leaf of the domestic types require dealers and manufacturers to indicate the weight basis on which the tobacco is reported, namely farm-sales-weight, marked weight, or sweated weight. The stocks are converted to the farm-sales-weight equivalent on the basis of the amount reported in these three categories. The conversion factors by types of tobacco for October 1, 1951 are as follows: Type 41, 107; Types 42-44, 112; Type 51, 107; Type 52, 106; Type 53, 112; Type 54, 106; Type 55, 107; Type 61, 110; Type 62, 108. October 1, 1951 figures subject to revision.

2/ For explanation of stocks included in this classification, see footnote 5 on page 18.

3/ Foreign-grown leaf is converted to an unstemmed equivalent basis only.

4/ Does not include Sumatra and Java leaf stored in the Free Trade Zone.

* Revisions in July 1 report.

** Revision in October 1, 1950 report.

Table 4.-Stocks of leaf tobacco, by types and groups of grades, owned by dealers and manufacturers, October 1, 1951, compared with July 1, 1951 - Cont'd.
(REPORTED WEIGHT)

- 1/ Subject to revision.
- 2/ Most of the stocks in the X and Y groups will go into scrap chewing manufacture as well as part of that included in the scrap group.
- 3/ Includes Puerto Rican on the Island, Type 46.
- 4/ Type 84.-Other foreign-grown all shown in the C group.
- 5/ Although Type 73 is defined as all domestic types of tobacco not otherwise classified, the bulk of the stocks reported in this type consists of cuttings, clippings, and trimmings. This is the result, in most instances, of the inability of reporters to designate cuttings, clippings, and trimmings in the "S" group of the types to which they properly belong.
- 6/ Type 77.-Domestic Aromatic formerly reported under Type 73.
- 7/ Does not include Sumatra and Java leaf stored in the Free Trade Zone.
- * Revisions in July 1 report.

^{1/} These statistics represent the quantity of leaf tobacco reported as owned by all leaf tobacco dealers, manufacturers, quasi-manufacturers, growers' cooperative associations, warehousemen, brokers, holders, and owners subject to provisions of the Tobacco Stocks and Standards Act approved January 14, 1929, and the amendments thereto passed in the 72nd and 74th Congress. The quantities owned by dealers and manufacturers have been tabulated separately on a type total basis.

^{2/} The quantities shown as owned by manufacturers include tobacco which is held under dealer registries of manufacturers and also tobacco held by dealers and known to be purchased on order for foreign or domestic manufacturers. The quantities shown as owned by dealers may include some tobacco held by dealers which is earmarked for sale to domestic manufacturers or for export. The table should therefore be considered as representing only the approximate quantities owned respectively by dealers and manufacturers.

^{3/} Includes stocks on the Island of Puerto Rico.

^{4/} For explanation of stocks included in this classification see footnote 5 on page 18.

^{5/} Does not include Sumatra and Java leaf stored in the Free Trade Zone.

* Revision in October 1, 1950 report.

Table 6.--Stocks of leaf tobacco owned by dealers and manufacturers, summary by types, October 1, 1951, compared with other quarters ^{1/}

^{1/} These statistics represent the quantity of leaf tobacco reported as owned by all leaf tobacco dealers, manufacturers, quasi-manufacturers, growers' cooperative associations, warehousemen, brokers, holders, and owners except (a) the original growers of tobacco; (b) manufacturers who in the first three quarters of 1950, according to the returns of the Commissioner of Internal Revenue, manufactured less than 35,000 pounds of tobacco, less than 185,000 cigars, or less than 750,000 cigarettes, pursuant to the provisions of the Tobacco Stocks and Standards Act approved January 14, 1929, and the amendments thereto passed in the 72nd and 74th Congress.

^{2/} Subject to revision.

^{3/} For explanation of stocks included in this classification see footnote 5 on page 18.

^{4/} Does not include Sumatra and Java leaf stored in the Free Trade Zone.
